PROFESSIONAL SUMMARY

Security Analyst with 10 months experience through internships and individual projects, specializing in web, android, API security. Skilled in conducting security assessments for real-world clients, executing patch management, and reducing vulnerability exposure by up to 80%. Developed an AI-powered Web Application Firewall with a 97% detection rate and implemented an ECDSA-based digital signature system that reduced unauthorized access risks by 75%. Adept at delivering actionable security reports, focused remediation strategies, and strengthening overall security posture.

EXPERIENCE

Cyber Security Trainee | Riskberg Consulting Private Limited

November 2025 - Present

- Delivered 30+ Vulnerability Assessment and Penetration Testing (VAPT) of applications for real-world clients.
- Performed Web and Android application security testing based on the security standards.
- Executed security configuration reviews, including AWS environments and firewall configurations.
- Produced comprehensive security reports with standardized reporting structures, risks, and recommendations.

Cyber Security Analyst Intern | Securium Solutions Private Limited

August 2025 - October 2025

- Conducted 20+ Vulnerability Assessment and Penetration Testing (VAPT) of web applications for real-world clients.
- Performed security assessments based on client-specific requirements to identify and validate potential risks.
- Executed patch management or updates to ensure identified vulnerabilities were remediated effectively.
- Produced comprehensive security reports with standardized reporting structures, risks, and recommendations.

Security Analyst Intern | SQBGN SafeYourWeb Infosec Pvt. Ltd.

March 2025 - June 2025

- Conducted penetration testing on web applications, identifying and mitigating over 80% of critical vulnerabilities.
- Remediated vulnerabilities including SQLi, IDOR, Broken Authentication, XSS, Rate Limiting and so on.
- Authored detailed security reports, providing actionable insights that remediate timelines by 30%.

PROJECTS

Security Lens: Chrome Extension | Live: [Link](#)

May 2026

- Developed a Chrome extension with 7 VAPT modules for web application reconnaissance and security assessment.
- Implemented vulnerability detection and automated security analysis to identify common web security risks.
- Integrated CVSS v3.1 scoring and report generation for efficient risk prioritization and reporting.

Web Application Firewall | Video: [YouTube](#), Code: [GitHub](#)

May 2024

- Built a data pipeline using Burp Suite and OWASP ZAP to classify web traffic for training an ML-based WAF.
- Designed and deployed a proxy-based WAF using ML techniques, achieving a 97% malicious request detection rate.
- Improved application layer security by intercepting and classifying incoming traffic in real-time.

TECHNICAL SKILLS

Programming Languages & Databases: Python 3.13, Java 8, MySQL

Cybersecurity: Web Application Security, Android Security, API Security, VAPT

Security Standards: OWASP Top 10 (Web, Api, Android)

Tools: Kali Linux, GitHub, Vercel, Burp Suite, Nmap, Nikto, Wireshark, gobuster, OWASP ZAP

CERTIFICATIONS

Certified Ethical Hacker (CEH) | EC Council: [Link](#)

Certified Appsec Practitioner (CAPv2) | SecOps Group: [Link](#)

Google Certified Cybersecurity Professional | Google, Coursera: [Link](#)

Network Support and Security | CISCO: [Link](#)

EDUCATIONS

Galgotias University | Bachelor of Technology in Computer Science

June 2022 - June 2026

- Current CGPA: **8.4/10.0**

ACHIEVEMENTS

Public Speaker - GDG New Delhi Devfest 2k24: Delivered sessions on "AI-Powered Cybersecurity: Strengthening Defense with Machine Learning" to 100+ attendees, contributing to a 35% increase in event participation and engagement.

Global YNOV HTB CTF | Led team Comrades 2.0 to achieve 11th Rank Worldwide and 1st Rank at the College Level in the Global Ynov HTB CTF, demonstrating strong leadership, problem-solving, and team coordination under pressure.

Cybersecurity Content Creator - Instagram | [Link](#): Documented journey in cybersecurity through 40+ educational posts, covering topics like cyber security, ethical hacking and personal project insights. This consistent sharing improved engagement by 2x and fostered meaningful networks.

FortiXAI Security Community | [Link](#): Founded and lead a cybersecurity community, providing mentorship, career guidance, and knowledge-sharing sessions for 50+ aspiring security professionals. Organized online workshops, skill development, and awareness of emerging cybersecurity trends.
